**RESPONSE A**

This is in response to an Office Action, mailed November 7, 2001 (paper no. 8), wherein the USPTO rejected claims in the above-referenced patent application. Submitted herewith is a petition for a one-month extension time to extend the time for response to March 7, 2002. The Applicant respectfully requests entry of the amendments presented below and reconsideration of the claimed invention in view of the presented amendments and remarks that follow.

**In the Claims**

Please amend the claims to read as follows:

ai

1. (Amended) An olefin polymerization catalyst comprising a cationic complex that results from contact of a neutral transition metal compound to an activator composition wherein the neutral transition metal compound is represented by the following formula:
